

MINOR IN SUSTAINABILITY SCIENCE

The sustainability science minor is designed for students in all majors who have an interest in sustainability. The minor provides students with the necessary academic training to apply scientific knowledge and principles to sustainability practices. This minor will help these students become better prepared to address some of our pressing local, national and international problems in sustainability. *The minor is open to students now, but they must wait to declare it formally until it appears in the 2016 catalog*
