Requirements for Transfer Engineering applicants (domestic students)
Effective for the fall 2013 semester

To be admitted to the School of Engineering as a transfer student, a student must have the following:

1) A 2.50 cumulative grade point average from all post-secondary institutions attended.
2) A grade of “C” or higher in Calculus I
3) A grade of “C” or higher in one of the following required sciences in the Engineering curriculum:
   General Chemistry I, Physics I, or Biology (for Bio-medical Engineering only)

If the student is in progress for Calculus I and/or the science requirement at the time of admission, he/she may still be admitted but will be required to show successful completion (“C” or higher) before matriculation.
