Graduation rates are a measure of the success of students in attaining their educational goals. A graduation rate is the percentage of students in a given entering cohort (group) who graduated within a specified period of time. The number of students in the entering cohort is the denominator of the rate; the number of students graduating is the numerator of the rate. The entering cohort of an institution includes all first-time, full-time degree-seeking undergraduate students who began in the stated cohort year. The time period is 150% of normal time to program completion (for example, for a four-year program, the graduation rate would include students who graduated within six years of beginning the program).

The transfer-out rate is the proportion of students in the entering cohort who are known to have transferred to another institution within 150% of normal time to program completion.

First-time, full-time undergraduates entering in Fall Semester	2011	2012	2013
