

Visitor Guidelines

Updated March 22, 2022

In accordance with current state guidelines, Widener University will allow hosted visitors on campus. Mitigation strategies in place, including vaccination and booster requirements for students and employees, have allowed us to protect our community. As the pandemic is monitored continually, these guidelines are subject to change as needed.

1. Visitors are welcome on campus but must be hosted by a student, faculty, or staff member.
2. Pre-approval is not needed if these proposed guidelines are followed unless the event is a large non-class indoor event with 50 or more people. **Approval by the Divisional Vice President** taking into consideration the status of the pandemic is needed for these events.
3. Visitors are required to follow the university's masking policy.
4. Events should utilize outdoor spaces as much as possible.
5. Visitors should remain outdoors as much as possible during their visit.
6. Instruct guests on hand sanitizing stations in common areas as well as restrooms for handwashing.
7. If food is necessary grab and go options should be considered.
8. Visitors who are feeling ill should not attend campus events or return home if already on campus. This should be communicated both before the event and at the event. At no time should anyone who is ill be on campus.

All events in accordance with the above guidelines are approved by the Health Advisory Group
